{yifeng6, lingming}@illinois.edu
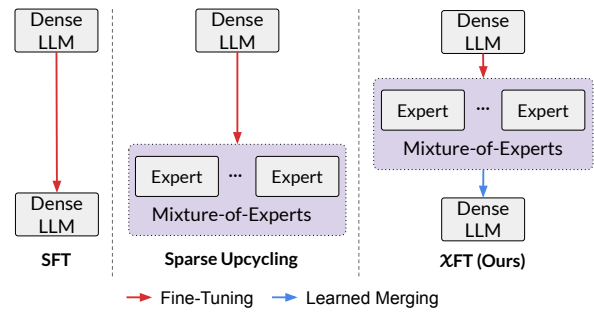

Abstract

ation (Chen et al., 2021; Austin et al., 2021), code

engineering (Lai et al., 2022).

MoE (Dai et al., 2024) and MoCLE (Gou et al., 2024). $\mathcal{X}$FT also includes a novel routing weight

expert and the original dense layer, which will otherwise lead to performance degradation (Wu et al.,

man et al., 2022), $\mathcal{X}$FT uses a learnable model

Mixture-of-Experts (MoE) can efficiently scale up

pass@1 on HumanEval and 64.6 pass@1 on Hu-

$$\sum_{i}^{N}(g_{i,t}\text{FFN}_i(\mathbf{u}_t^l)) + \mathbf{u}_t^l$$
$$\begin{cases} s_{i,t} & s_{i,t} \in \text{Topk}(s_t, K) \\ \end{cases}$$

efficient fine-tuning (Chen et al., 2022).
et al., 2020; Du et al., 2022; Fedus et al., 2022;

RAMoE (Dou et al., 2023) and MoCLE (Gou et al.,

Original Dense Block

Upcycled MoE Block
